EXPERIENCE

Fullstack Developer & DevOps

Mercedes-Benz AG

📅 October 2019 – Ongoing 📍 Sindelfingen

- Full development of TAFmeasures - KPI dashboard for global IT
- Development on MO360-FTK (Microfrontend Framework)
- Project Lead & Development - MO Connect (WebApp + Mobile)
- DevOps strategy and training with Azure DevOps
- Docker, Kubernetes, DHC (Daimler Hybrid Cloud)
- Kubernetes cluster deployment with GitOps and IaaS
- Adapting and driving OpenID Connect technology
- API development and management across teams

Kubernetes

Docker

Azure DevOps

Software Developer

Daimler AG

📅 June 2018 – September 2019 📍 Sindelfingen

- WebApp Development
- Development on Switch (Framework for WebApps)
- Project-Lead and Development of production application MO Connect
- Development and Establishment of Daimler Styleguide
- Different backend and infrastructure projects
- Driving DevOps strategy base on CI/CD pipelines via Gitlab and Azure DevOps
- Docker, Kubernetes, DHC (Daimler Hybrid Cloud)
- Agile Coordinator

Software Developer (Student)

Daimler AG

📅 July 2017 – May 2018 📍 Sindelfingen

- Machine Learning, App-Development
- Fullstack Development of server and web applications
- innovation-Driven focus
- Server-Management and administration
- Testing of DevOps strategies via CI/CD pipelines based on Gitlab and Rancher
- Cultural Change, Agile Transformation and Coaching
- OpenSource Development (Restyaboard)

MY LIFE PHILOSOPHY

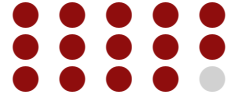

"Doing does solve things."

SKILLS

JavaScript/TypeScript

React

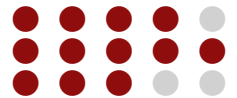

HTLM/CSS/SASS/LESS

Java/Kotlin

NodeJS

Python

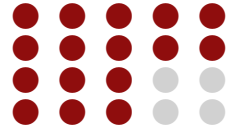

Docker/Kubernetes

Azure DevOps

Gitlab DevOps

Google Cloud Platform

Kanban

Git

Scrum

LANGUAGES

German

English

Russian

EDUCATION

M.Sc. in Software Engineering

University Stuttgart

📅 10/2015 – 04/2018

B.Sc. Software Engineering

University Stuttgart

📅 10/2013 – 09/2015

CERTIFICATIONS

Cloud Engineering with Google Cloud Specialization

Coursera 2020

CERTIFIED KANBAN COACH®

IBQMI® 2019

Software Developer (Student)

AEB GmbH

📅 April 2015 – June 2017 📍 Stuttgart

- Development of international solutions for customs including export, import and transit
 - Close co-operation with foreign counties
-

Research assistant

University Stuttgart

📅 October 2013 – April 2016 📍 Stuttgart

- Development WebVOWL
- Development OWL2VOWL

PROJECTS

MO360-FTK

OpenSource/Github

MO360-FTK is a microfrontend framework for developing efficient and reusable web components across multiple webapps. This provides a fast user experience and helps deploying developer their code independent from the original webapp.

DevOps for Glances

OpenSource/Github

Glances is a cross-platform monitoring tool which aims to present a large amount of monitoring information through a curses or Web based interface. The information dynamically adapts depending on the size of the user interface. I help the developer to create efficient pipelines with Github Actions and also help maintaining the Docker containers for the tool.

Restyaboard

OpenSource/Github

Initiated setting up a Docker based solution for the software Restyaboard. It is a Kanban alternative program like Trello. Still i am the supporter and maintainer of the Docker solution and helping providing some general CI/CD concepts for the project.
